

Project Title: Beauty Products Sales Analytics Dashboard

1. Business Objective

The objective of this project is to create an **interactive Power BI dashboard** that helps stakeholders analyse **sales performance of beauty products**, track key KPIs, understand customer behaviour, and support **data-driven business decisions**.

2. Business Problem

Currently, sales data is available in raw Excel format, making it difficult to:

- Track overall sales and profit quickly
- Compare product/category performance
- Identify top customers and regions
- Monitor gender-wise and country-wise sales trends

A centralized dashboard is required for **quick insights and better visibility**.

3. Data Source

- **Primary Source:** Excel file (Beauty Products Sales Data)
- **Data Type:** Structured
- **Key Tables/Columns:**
Order Date, Product Name, Category, Sales Amount, Quantity, Profit, Customer Name, Gender, Country, Region.

4. Report Creation

Step 1: Data Import

- Import beauty products sales data from Excel into Power BI.

Step 2: Data Analysis & Transformation

- Check relationships between product, customer, and sales data.
- Format date, currency, and numeric columns.

Step 3: Data Cleaning

- Remove duplicate records
- Handle missing values
- Correct incorrect category names
- Create calculated measures using **DAX**

5. Dashboard Visualizations

KPIs (Cards)

- Total Sales
- Total Profit
- Total Orders
- Total Customers

Slicers

- Date
- Category
- Gender
- Country / Region

Charts Used

- **Donut Chart:** Sales by Category
- **Pie Chart:** Sales by Gender
- **Stacked Column Chart:** Sales & Profit by Sub-Category
- **Clustered Bar Chart:** Top Products by Sales
- **Map Chart:** Country-wise Sales
- **Line Chart:** Monthly Sales Trend

6. Key Insights from the Dashboard

- Which beauty category generates **maximum revenue**
- Products with **highest and lowest sales**
- Gender-wise purchasing patterns
- Regions contributing most to sales
- Seasonal trends in beauty product demand

7. Business Benefits

- Helps identify **best-performing beauty products**
- Improves **marketing and product planning**
- Supports **targeted promotions**
- Enhances customer understanding
- Increases overall business efficiency

8. Conclusion

The **Beauty Products Sales Dashboard** provides a **clear and interactive view** of sales performance across products, customers, and regions.

By using **KPIs, slicers, and meaningful charts**, the dashboard helps stakeholders **track growth, identify opportunities, and improve business decisions**.

This report supports **strategic planning and long-term business growth** in the beauty products market.
